THE BEGINNING

129

The first step in challenging the masters of war is to expose them

printed on
recycled paper

5-2
1-50

This book is dedicated to
the unknown victims of
Hiroshima and Nagasaki,
the people of Korea,
40 000 of whom were murdered
by the United States
bomb tests and the
66 560 000 others
who are today facing the
re-escalation of a
war which has already claimed
the lives of 3 000 000

and to all people
murdered, maimed,
starved, used,
robbed and
kept in poverty
by
the masters of war

Renegade Activists believe that it is not enough to call for the cancellation of one particular weapons show. The connections must be made between all the diverse faces which are donned from moment to moment by the powers which feed off injustice, oppression and greed.

Whilst ever we allow corporations and governments to amass power and wealth at the expense of the planet and the vast majority of its people who live in misery and fear, then we must all accept responsibility.

Whilst ever we accept the lie that it is necessary to fortify 'our' possessions, 'our' land with terrorism, suppression and murder, then we must accept the arms trade

Whilst ever those of us who live in a country where some of this wealth and power has accumulated, allow our silence, our peace, our existence to be bought with the crumbs that fall our way, we must accept every injustice, every humiliation, every reality of the choices we have made.

MILITARY AUSTRALIA

A little over two hundred years ago, after many failed attempts, the land now known as Australia was successfully invaded by Europeans. This was accomplished by the use of Western weapons technology, Western hypocrisy and slave labour. One of the first tasks undertaken by the Europeans was the establishment of a military industry. This military industry was not set up with the purpose of defence but rather with the twin purposes of committing genocide on the indigenous populations and the maintenance of a penal colony, Australia's first foreign military base.

The establishment of governments, Federation, the various changes of government have not changed Australia's position. Australia still has a thriving military industry based not on defence but rather on the subjugation of indigenous peoples and the maintenance of a foreign military presence.

Arms companies operating in Australia are usually subsidiaries or representatives of large foreign corporations, reflecting the role of the Australian Government in its subservience to foreign powers and this has helped foster an industry of supplying components such as software and body panels to the manufacturers of the latest killing machines in the United States and elsewhere. This makes it impossible to determine exactly where and how Australian components are used (much like Australian uranium) and makes the Australian export 'controls' at best laughable.

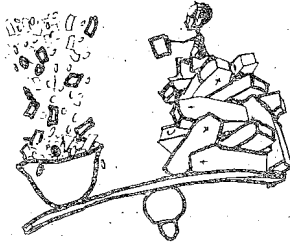

Australia's other major market is the supply of primarily anti-insurgency equipment to repressive governments of the Asia Pacific region. Sales of ammunition to Indonesia and helicopters to Papua New Guinea counteract all the bleeding heart assurances of the Australian Government that arms will not be exported to countries that 'have gross human rights abuses'.

The planned private enterprise testing range at Woomera, space base on Cape York and the alienation of land for foreign military bases and war games has continued Australia's two hundred year tradition of repression of Aboriginal people by the military.

THE ARMS TRADE

AN OVERVIEW

ARMING POVERTY

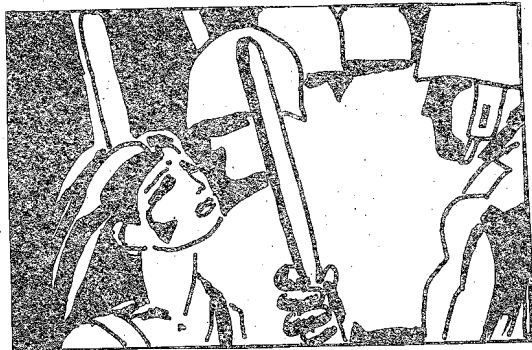

"Every gun that is made, every warship launched, every rocket fired represents, in the final analysis, a theft from those who hunger and are not fed and from those who are cold and are not clothed"

Former U.S. President Eisenhower summed up one of the effects of the arms trade quite succinctly after he was no longer in a position to do anything about it. In 1989 the President of the World Bank, Barber Conable estimated that a full one third of some Third World countries foreign debt can be attributed to arms purchases. This debt is compounded by interest and relief loans. The usual methods of raising revenue to repay these loans is to cutback on social services such as health and housing and by fiercely competing for exports, sending prices (and wages) down. Either way its the poor that pay.

Sending desalination units to the Persian Gulf to support the war effort was easy, sending desalination units to the Australian desert where people are suffering with Trachoma because they can't get clean water appears to be a lot more difficult.

ARMING REPRESSION

Australia has in the last financial year supplied military equipment to such luminaries of human rights as France, Malaysia, Indonesia, Myanmar, the United States, South Korea and the Philippines. Australia made sales of ammunition in the last financial year to New Caledonia, the Australian Government's claim that this was merely 'sporting' ammunition is as plausible as last year's claim that the PT6 engines repaired for the Burma

Air Force were for trainer aircraft (these engines are used to power the BAF's counterinsurgency wing which this year undertook the most intensive air bombardment ever of the indigenous populations and students on the Thai border). The sale of sporting ammunition to New Caledonia poses the question "What does the Australian Government condone as sport?"

The Australian Government must be aware of how Australian weapons are being used, yet rather than restricting their sale, they are actively pushing for an increase in the sale of such equipment. The Australian Government must also be aware that maintaining repressive governments in some countries can only work for the good of many of its 'mates', the international big business community, by ensuring low commodity prices, a burgeoning arms market, cheap labour and tax havens.

Could it be that the Australian Government is acting in collusion with these companies to create an international economic atmosphere where business will profit and governments which are friendly to this ideal will be maintained?

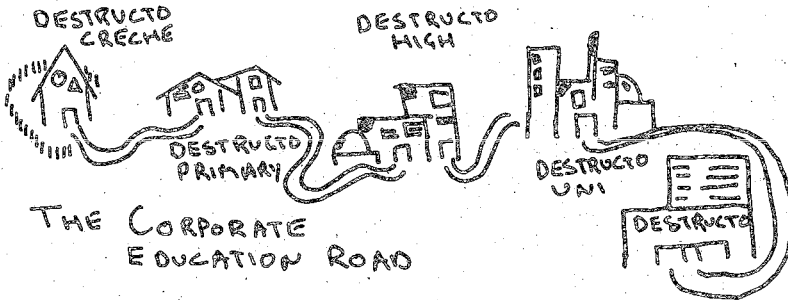

ARMING EDUCATION

One of the more insidious facets of the current NSW Government push for schools to seek corporate sponsorship is not the idea of advertising on school uniforms but rather the lack of advertising of who is paying for our children's education.

It has been the situation in Australian universities for some time that corporations fund scholarships and research grants. Arms manufacturers have not been slow in exploiting this commercialisation of education, many of whom have undertaken to follow this path of research. Tax write-offs and the kudos of 'doing something for the community' combined with the ability to direct the future of education is an opportunity too good to be passed up.

The research capabilities of Australian universities are pushed as a major attraction in Federal and State Governments' advertising for arms dealers to set up shop in Australia and this has already resulted in the formation of 'technoparks' either on or adjacent to the grounds of most major universities. The Australian Government has recently announced the formation of 15 'co-operative research centres' to facilitate the integration of the academic and corporate sectors. The Victorian Government supported Swineburne Institute's stand at PRIDE90 (the Pacific Regional International Defence Exposition) held in Manila last November.

AUSTRALIANS TRADING IN DEATH AND DESTRUCTION

Many university students are already in a position where furthering their education involves tailoring their courses to chase corporate sponsorship. Public schools, at least in NSW, may also soon find themselves specialising in subjects which attract the corporate dollar. One of the first results of the 'corporatising' of NSW high schools was the end of the peace studies course and the opening of 'Technology High Schools' sponsored by arms companies.

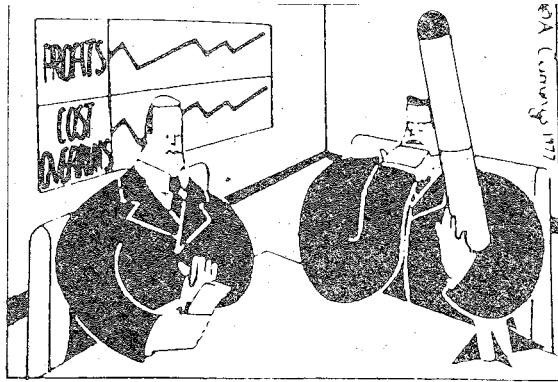

ARMS AGAINST THE ENVIRONMENT

For some reason figures relating to environmental degradation by the military in Australia are extremely hard to come across. We do however have information on what is happening in other countries and can reasonably assume the situation in Australia to be similar. In the United States, the Government General Accounting Office (GAO) estimates that the Department of Defence generates more toxic waste than the five major U.S. chemical companies combined, and this does not include any waste from nuclear weapons! This is the reality of the military manufacturing industry.

The Australian Government, in trying to attract weapons corporations to our shores has given approval in principle for a private enterprise weapons testing range to be built at Maralinga in South Australia and has already recommenced rocket launches from the area. The proposed Space Base on Cape York will also be a new military establishment, with a defence manufacturing centre incorporated in the design. Plans for Jervis Bay have not yet been scrapped and war games similar to Kangaroo89, which saw tens of thousands of Australian and foreign troops wreak havoc on the environmentally fragile areas of northern Australia, are planned for the near future. War games are used to demonstrate and refine military equipment.

Australian weapons are sold to countries such as Malaysia, Indonesia, Brazil and the Philippines where they are used against indigenous people fighting for the preservation of the environment.

AUSTRALIANS TRADING IN DEATH AND DESTRUCTION

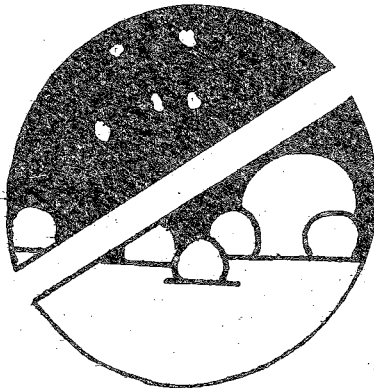

"I CAN'T SEEM TO SHAKE THESE RECURRING NIGHTMARES OF THE GOVERNMENT ASKING US TO MANUFACTURE SOMETHING USEFUL."

FOREIGN BASES

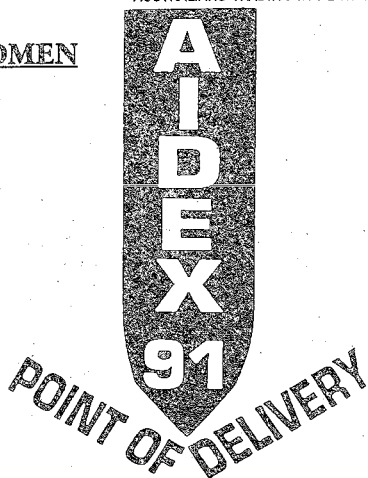

A major facet of Australia's role in the arms trade is the hosting of foreign military bases. Bases are the command, control, communications and intelligence (C3I) groundstations without which modern weapons could not operate. Intelligence information is a weapon in its own right and the selling of information inherent in the hosting of foreign bases is yet another form of weapons trading.

U.S. bases in Australia are exempt from both U.S. and Australian customs and environmental controls, lead, mercury, TCE and PCBs have been found dumped at sites of U.S. bases all over the world. The links between foreign bases and drug trafficking and the incidence of venereal diseases are well documented.

Foreign bases in Australia are used to alienate Aboriginal land, conduct other countries wars and spy on our neighbours. They constitute a serious health risk, are the cause of many social problems and an insult to Australia's sovereignty.

WAR ON WOMEN

In the forty four years between 1945 and 1989 more than 13 000 000 civilians (official figures only) have been killed in wars, more up to date figures are not yet available.

Of these 13 000 000 civilians, most have been women and children.

Women are the first to go without food, shelter or education in times of poverty.

Women are first to go without necessities in times of war.

Women are the targets of indiscriminate bombing raids.

Women are raped and tortured both by invaders and the armies of 'their side'.

Women are used as 'entertainment' by troops at military establishments.

Women are the victims of diseases from which they have no protection.

Women are left to care for the children, the old, the mutilated.

War and the planning for war is the ultimate paradigm of the present patriarchal system.

Of the 900 people listed as company representatives in the AIDEX89 catalogue, less than 8% were women and all but a few of those were listed as either secretaries or 'market consultants'.

The arms trade is carried out by men for men, it is but one of the methods used in the subjugation of women.

AIDEX '91

CANBERRA NATIONAL
EXHIBITION CENTRE,
NOVEMBER 26-28, 1991

BOOKINGS NOW OPEN FOR AN EVEN BIGGER AND BETTER SOUTH PACIFIC DEFENCE SHOW

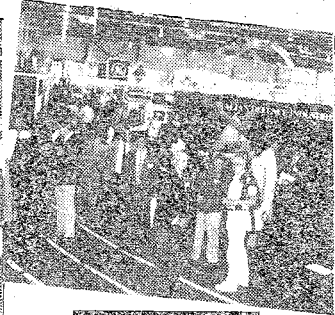

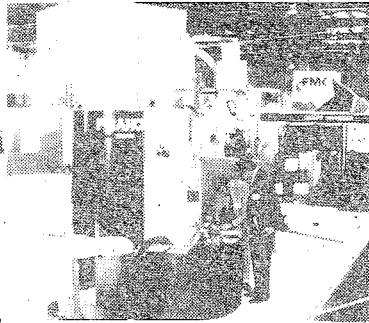

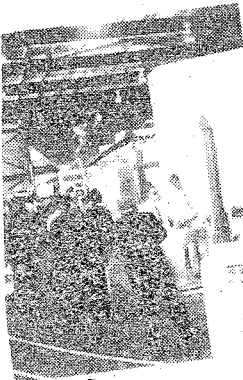

MAJOR EXHIBITORS BACK IN FORCE

The unqualified success of Aidex '89 has already resulted in bookings from major national groups and individuals for this year's big show.

ECONOMICS

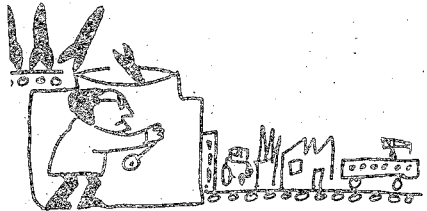

There are three main arguments used to defend the push for an increase in weapons production.

- *that weapons production creates jobs and stimulates employment in related areas.
- *that weapons production earns export dollars which helps Australia's balance of payments.
- *that research into weapons technology has technological spin offs which are beneficial to other areas of production.

JOBS

The myth of weapons based job creation belies the facts.

In the U.S.A. \$1 000 000 spent on missile production creates 9 jobs. Spending the same money on producing military aircraft would create 14 jobs; on cleaning up air, water and solid waste pollution 16.5 jobs; on local transport 21.5 jobs; on education 63 jobs. In Germany each \$1 000 000 cut from the military budget and spent on alternative programs would create between 1.5 and 11 new jobs. In India, a country where people are starving, over 100 jobs could be created in agriculture for every job lost in an ordnance factory.

'Jobs for Australians' is nothing more than a cynical attempt by government and industry to keep Australian workers quiet on this issue.

B.O.P.'S

When export earnings of up to a billion dollars are spoken of in proud voices by the proponents of the weapons industry it is like a habitual gambler boasting his winnings and failing to mention his outlay.

Much of the revenue gained by arms exports leaves the country as soon as it comes in as the low taxed, untaxed or even negative taxed profits of foreign weapons companies.

AUSTRALIANS TRADING IN DEATH AND DESTRUCTION

Money spent by the Australian Government on testing ranges, security services and infrastructure for these companies and in Government staff monitoring etc would more than outweigh any financial gain for Australia. Even if the benefits were real, the morality of such ill gotten financial gain is highly questionable.

TECHNOLOGICAL SPIN OFFS

The Defence Science and Technology Organisation (DSTO), the research arm of the Australian Defence Department employs over 4 000 people. It is true that there are some spin offs from defence technology such as signalling systems for trains, marine dye markers, new alloying techniques etc, but when considered in terms of 67 200 000 person hours, including the time of some of the best research scientists in the world, it is very hard to find enough spin offs to justify this argument in the period from 1981 to the present. When you add to this figure of over 67 million hours the weapons research undertaken both privately and in universities, useful technology spin offs end up being very expensive.

According to Prof. Melman, (Prof. Industrial Engineering, Columbia University) in a talk given in Sydney, a reason for this is that scientists in the defence field work on a 'cost-maximising' basis. He cites as an example the coffee making machine for the C5B military freighter which costs \$7 622 but can still function at 40 times the force of gravity, thus the plane could crash, the crew die, but the machine would go on making coffee.

The civilian spin offs from this technology are obvious.

HIROSHIMA REMEMBERED 1991

"HIROSHIMA — NEVER AGAIN"

Every year in early August, millions of people all over the world come out into the streets to proclaim "No More Hiroshimas." Government leaders attend ceremonies and pat each other on the back for having gone another twelve months without even once having used a nuclear weapon in anger. Prayers are said for the Japanese victims of the Hiroshima and Nagasaki bombings. The thousands of Korean victims who were forcibly taken to Hiroshima and Nagasaki as labourers during the war, are by and large forgotten as the USA prepares to 'help' North Korea act like a responsible international citizen', (Bushspeak for destabilise and invade). Many governments continue to murder innocent people through their nuclear weapons programs and the death toll from the use of conventional weapons continues unabated, with over 22 000 000 people killed in wars since the end of World War II.

ALLIS - CHALMERS	ALLIS MINERAL SYSTEMS 45 Hargraves St CARRINGTON 2294 PH 049 69 1200 FX 049 62 2309	produced special purpose pumps and carried out U-235 Electromagnetic Gaseous Diffusion for the Manhattan Project	mineral processing equipment for all Australian mining industries >Connected with SIEMENS (see general list)

CHRYSLER	Chrysler Australia was taken over by Mitsubishi in 1980 and is no longer a subsidiary of the Chrysler Corp.	produced diffusers for the Manhattan Project - a process which had effectively stymied the project until the assistance of the Chrysler Corp. was offered	It is ironic that this company is now owned by Mitsubishi - whose factories were 'ground zero' for the Nagasaki bomb >see MITSUBISHI in the general arms dealers list
DU PONT	DU PONT (AUST) 168 Walker St NTH SYDNEY 2080 PH 02 923 6111 FX 02 929 7217 636 St Kilda Rd MELBOURNE 3004 PH 03 522 3111 FX 03 529 6870	produced the plutonium for the Manhattan Project	produce a variety of chemical products many of which are used by military manufacturers >consumer products include agricultural goods such as pesticides, carpet and TEFLON

AUSTRALIANS TRADING IN DEATH AND DESTRUCTION

Nowhere is the mockery and cynicism with which the bombings of Hiroshima and Nagasaki are held by world leaders more evident than in the corporate world of weapons production.

The same companies which profited then are still profiting today. Profiting from the war mongering of governments such as the Australian Government who sycophantically offer oblation to the masters of war, the source of their power.

In the corporate world of weapons production there are no sides, no winners and no losers, only a profit to be made. The same company whose factories were 'ground zero' of the Nagasaki blast has, unlike its employees, survived quite well and is now happily building weapons in collaboration with the companies which produced the bomb that hit them.

The table on these pages gives some indication of who was involved and how. It can be seen quite clearly that the stereotype of the arms manufacturer as a company producing bullets and guns must be set aside. All of the companies listed and many more, knew what they were building and why they were building it.

Some companies may have diversified, changed ownership, swapped divisions or flags with each other, but their structure remains the same.

GENERAL ELECTRIC CO	GENERAL ELECTRIC CO. USA 8 Stephen House 32 Thesiger Court WEST DEAKIN CANBERRA 2600 PH 06 281 0565 FX 06 285 1673	carried out U-235 Electromagnetic gaseous diffusion for the Manhattan Project	This division of GEN ELECTRIC produces aerospace weaponry other divisions in Australia market a range of electrical consumer goods under the General Electric name

THE MASTERS OF WAR

WHO ARE THE MASTERS OF WAR?

WHO IS IT THAT PROFITS FROM SPREADING THE DISEASE OF MILITARISM?

The pages that follow are full of companies operating in Australia that supply military products and services. The first step in challenging the Masters of War is to expose them.

There is a misapprehension that is rife among both people working on peace & justice issues and the community at large, that all arms dealers sell guns and bullets, bombs, planes and tanks.

The military industrial complex is indeed, a lot more complex than that.

Supplies of computer software, sleeping bags, tyres, buildings, water purifiers, food, switchboards, paint....anything which is designed for or adapted to military use is a weapon, from the stealth bomber to a soldier's boots. It all feeds the same machine.

The companies listed in these pages have been selected according to two criteria :

1. those that we know are supplying either the military or supplying a military supplier with specialised military components or
2. actively seeking to supply the military industry through such endeavours as advertising in military journals or displaying their wares at war fairs such as AIDEX.

All of this information is freely available, a lot of it was lifted straight from their boastful advertisements.

Some of these companies are your cliché Masters of War, others are just greedy little businessmen who don't care where they get their money.

Some of these companies are suppliers of nuclear weapons, pulling the strings of governments, others are lackeys, competing with each other for a slice of the war spoils.

ALL ARE PROFITEERS.

I TEND TO THINK
OF AWA AS A
MANUFACTURER OR
PRODUCT ORIENTED
COMPANY

HOW CAN I
TELL HIM WE ALSO
HAVE REAL CAPABILITIES
IN SYSTEMS
INTEGRATION?

Have you heard of our BARRA, NULKA and MULOKA contracts? These are a good measure of the experience and expertise of AWA Defence Industries in defence systems.

Did you not know that we:

- Are the Prime Contractor for the Full Scale Engineering Development phase of the NULKA project?
- Designed, built and installed the LAN communications systems for air traffic control at the new RAAF Tindal airfield?
- Designed and supplied the Voice and Data Communications System at the Sydney Police Centre?
- Are the Prime Contractor for the operation, maintenance and upgrading of the experimental Jindalee OTHR in Central Australia?
- Are the Prime Contractor for the ESM Upgrade of the P3C Orion fleet for the RAAF?
- Designed and managed the installation of the Degaussing and Monitoring Ranges for the Navy?
- Built and installed AWA designed DVOR/DME Air Traffic Navigation Systems both in Australia and overseas?

- Designed and built the F/A-18 Avionics & Ground Test Equipment?

AWA is the largest Australian owned high technology and electronics communications company. Some 33% of its revenue is from defence and related activities.

Our total commitment is demonstrated through our investment, expanding capabilities and the successful pursuit of key strategic acquisitions. We fully support a strong indigenous Australian defence industry.

The collective experience and basic skills in large-scale systems integration, program management and manufacturing puts AWA Defence Industries in the forefront with our major competitors.

AWA Defence Industries comprises AWA Defence Industries Pty Limited in South Australia, C3 Pty Limited which has branches in Sydney, Adelaide and Canberra, and AWA Limited's Defence Industries, NSW Division at North Ryde and The Electronic Services Division which operates throughout Australia and has workshops in all the major capital cities.

HORNET TALES

"My wingman and I were on a practice interdiction mission west of Newcastle, just into the Singleton war zone. We'd already descended to low level for target ingress and my element was in a three mile trail behind the lead, doing 500 knots. The RWR lit up - hostile air intercept radar at 3 o'clock.

"Looking up I caught a glimpse of two bandits at 36,000 feet beginning a conversion. So I padlocked them, called my wingman to pitch up with me and selected air to air mode

with one quick action.

"A quick turn and I was able to nail the far bandit with an AIM9, but was forced to power back to avoid the head on IR missile. With that taken care of we merged inverted to 6000 feet. The other bandit was behind and above me, engaging my wingman.

"The aircraft began to shudder as airspeed decayed, a penalty for the heavy manoeuvring with two tanks and two Mk 82's. I slammed the

throttles into max after-burner and pulled up for the shot.

"Within seconds the reassuring surge of thrust came and I got the nose on, good tone and shot.

"The whole engagement was flown eyes out of the cockpit' and lasted only 40 seconds. With both bandits dead we descended to low level and pushed it up to 600 knots to catch up time. We delivered our weapons right on target at Singleton, on time and got home unscathed."

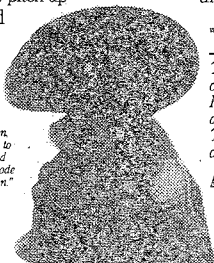

THE F/A-18 FAMILIARITY BREEDS AWE.

The F/A-18 strike fighter is a highly effective force multiplier - one plane with one pilot capable of flying more tactical missions more effectively than any other fighter aircraft. Hornet Tales are taken from actual pilot interviews. If you have a Hornet Tale to tell us about, send your name, address and telephone number to: McDonnell Douglas Hornet Tales, GPO Box 684, Canberra A.C.T. Phone (062) 47 0899. McDonnell Douglas prime contractor, Northrop principal subcontractor.

BEPAC is BOFORS in Australia. For a long time the name BOFORS was synonymous with anti aircraft guns. Today the company supplies a complete range of weapon systems, including air defence and anti tank weapons systems, naval weaponry and artillery. In 1989 BOFORS gained control of the defence electronics group of PHILLIPS ELEKTRONIKINDUSTRIER AB, greatly expanding their slice of the market. BEPAC sees itself as "a market leader in all our product niches. military command & control systems is by far our primary sector of activities. This includes naval systems (shipborne, C3 and weapon control.....), land systems (land-based, C3 and weapon control) and C3I air

AUSTRALIANS TRADING IN DEATH AND DESTRUCTION

defence networks. The sensors & counter measures area covers radar & other special sensors, mine warfare, munition electronics and ECM systems for both airborne & shipborne applications".

BEPAC will supply the command & control systems, the Sea Viking fire control systems and the complete combat system integration for the ANZAC frigates.

**Born of
necessity.
Tested
under fire.**

WITH SANCTIONS LIFTED WILL
SOUTH AFRICA BE AT AIDEX?

When buying arms, the least obvious source may present the best strategic opportunity. Armscor's weapons systems aren't for show. They're tested and proven in battle in some of Africa's toughest terrain. Take Top Gun. The G5155 mm towed gun howitzer. Extended range of up to 40 km with base bleed projectiles. Plus just 2 minutes from standstill to fire command. Gain the proven advantage without fanfare. Think Armscor. You can't buy better. Neither can we.

PERTH INTERNATIONAL AIRPORT, PERTH WA 6105
149-157 OLD COMMON RD, ROWES BAY QLD 4818
INDUSTRY HOUSE, NATIONAL CIRCUIT, BARTON ACT 2600

HDH, founded in Victoria in 1927 became a publicly listed company on the Australian Associated Stock Exchanges in 1984, approximately 30% of shares are held by Australians. HAWKER SIDDELEY GROUP PLC of the UK is the majority shareholder. Since the sixties HDH Sydney, Victoria & Perth have taken on international manufacturing programs as sub contractors to major overseas aerospace companies, in some instances as sole source, now over 50% of HDH's total business is in exports. Exporting to more than 20 nations, HDH employees work on joint projects or in liaison offices in North America, Europe & Asia. One of HDH's major engineering programs has been the manufacture of the General Electric F404 engine, in addition to this being used in RAAF FA18's HDH exports F404 components to the US for General Electric and the US Navy. HDH Salisbury specialises in the design & development of airborne weapons systems.

HDH is taking a leading role in the study of an international Spaceport on Cape York in North Queensland, which is planned to include a major military industry manufacturing park and has also teamed with Israel Aircraft Industries (who employ, on military projects, approx 7.5% of the total Israeli workforce) to modify Boeing 707 aircraft for the RAAF, they are working in the new hangar at Tullamarine which was purpose built for the project.

To list all of this company's war mongering activities would involve another book in itself (as is the case for many of the companies listed). HDH have specialist divisions working in space technology and all areas of aircraft & helicopter engineering. HDH design, manufacture, service, overhaul & / or assemble for many notable companies including: GENERAL ELECTRIC, ROLLS ROYCE, AVCO LYCOMING, PRATT & WHITNEY, ALLISON, SNECMA, BOEING, AIRBUS, SIKORSKY, MCDONNELL DOUGLAS and WESTLAND. Noteworthy uses to which HDH products have been put this year (1991) include the massacre of civilian populations in Burma (HDH repaired the engines used by the Counterinsurgency Wing of the BURMA AIR FORCE) and on Bougainville (HDH modified the helicopters which were used).

215 ADELAIDE ST
(GPO BOX 55)
BRISBANE QLD 4001

PH-07 228 5811
FX-07 229 7566

The large Brisbane law firm, Henderson Trout is expanding their business into the highly specialised area of air and space legal work. The company, with 30 partners, 80 professionals and 160 support staff, now has a senior partner specialising in such work. It has appropriate specialist contract arrangements with organisations in Canberra, Melbourne, Sydney, the United States and elsewhere. The Cape York Space Port project has highlighted a growing need and opportunity area for legal expertise. This applies not only to Cape York but to many major defence and aerospace works. If things go wrong, perhaps five or ten years into a project, the skill and forethought with which the original contracts were made is absolutely crucial

UNITED TECHNOLOGIES CORPORATION

43 BRIDGE ST
(PO BOX 600)
HURSTVILLE NSW 2220

PH- 02579 8000

FX 02-579 8905

MANAGING DIRECTOR: F LARSEN, OTHER DIRECTORS INCLUDE: K R MURDOCH

UNITED TECHNOLOGIES was the company originally referred to as "the Military Industrial Complex". One of the largest weapons manufacturing companies in the world, United Technologies usually hides behind its OTIS Elevator Division in most countries. Their products include: passenger & goods lifts; automotive diagnostic equipment; energy management systems; building systems; aircraft engines; gas turbine systems; energy process equipment; aviation maintenance facilities; air conditioning; electronic products; electronic & mechanical control equipment; rocket & missile propulsion systems; space life support systems; radar & data processing & facilities; electrical insulating materials; integrated circuits & computer component systems and helicopters. The fact that ex-patriate Australian media magnate, Rupert Murdoch sits on the

AUSTRALIANS TRADING IN DEATH AND DESTRUCTION

Board of United Technologies could have something to do with the fact that this company is never mentioned in the media and also why any debate on the arms trade in the mainstream media very quickly gets diverted.

UNITED BOOSTERS, a division of UT, will possibly win the contract for the management of the Cape York Space Base if it goes ahead.

SUBSIDIARIES INCLUDE: ADVANCED SYSTEMS RESEARCH,
AUTOMOTIVE,
CARRIER,
ESSEX,
HAMILTON STANDARD,
NORDEN SYSTEMS,
OTIS ELEVATORS,
PRATT & WHITNEY,
SIKORSKY,
SPACE TRANSPORTATION SYSTEMS.

PH-08 232 1690
FX-08 232 1893

GENERAL MANAGER: J. SMITH

TEKNIS produce and specialise in computer based remote control and supervisory communication systems for military application.

TEKTRONIX

80 WATERLOO RD
NTH RYDE NSW 2113
FX-02 888 0125

PH-02 888 7066

ALSO AT: 737 LOGAN RD, GREENSLOPES QLD 4120 AND NUMEROUS
LOCATION AROUND THE COUNTRY.

TEKTRONIX produce technical instrumentation and computer equipment, service analogue and digital electronic equipment. They market to scientific, industry, engineering, mapping and military. Specialised equipment for communications includes auto and fibre optics.

TELECOM AUSTRALIA

DEFENCE GROUP - JINDALEE PROJECT
35 WINTERTON RD
CLAYTON VIC 3168

PH-03 541 6000
FX-03 562 7745

PROJECT MANAGER B DE BOER

TELECOM'S Defence Projects Group has been established for just over 3 years and is looking to be involved in military projects, the projects manager was quoted as saying "a look behind the scenes of Telecom dispels any notion that it's sole purpose in life is to provide telecommunications". Many of the defence groups hopes and dreams must have been fulfilled recently, when Telecom won the contract to build the first two Jindalee over- the -horizon radar stations from the Department of Defence. On Telecom's 'team' for this project are LOCKHEED MISSILE and SPACE COMPANY and GEC MARCONI. The project involves a substantial financial risk, with expenditure estimated at approx. \$A980million.

TELEDYNE INDUSTRIES INTERNATIONAL INC.

285 WHITEHORSE RD
BALWYN VIC 3103

PH-03 836 7177
FX-03 836 1964

MANAGER: J. RICKARDS

TELEDYNE represent 22 Teledyne subsidiaries worldwide. They produce and market hydraulic and pneumatic components, navigation, aviation and communication systems, micro wave products, electric power systems, systems engineering, gas and diesel engines and remotely piloted vehicles. Teledyne are a major nuclear weapons contractor to the US Defence Department.

TELEFUNKEN SYSTEMTECHNIK GMBH

PO BOX 63
HAWKER ACT 2614

PH-06 255 1282
FX-06 255 1217

AUSTRALIAN CONSULTANT: T. E. TOOHEY

TELEFUNKEN products include command control and guidance systems, communications equipment, antennas and air defence systems including: radars, fuses and seeker heads.

TEXTILE INDUSTRIES AUSTRALIA LTD

159 VICTORIA PDE
COLLINGWOOD VIC 3066

PH-03 417 7177
FX-03 419 7420

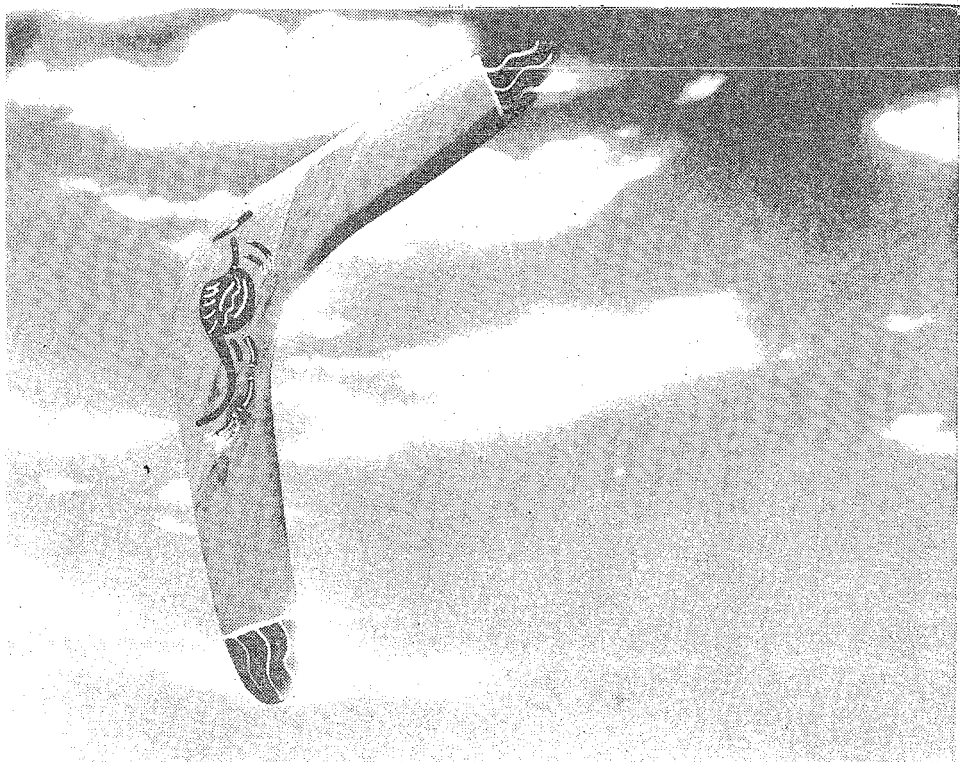

GOVERNMENT CONTRACTS MANAGER: A. EASTWOOD.

*HEAD OFFICE 12-28 ARNCLIFFE ST
ARNCLIFFE NSW 2205*

TEXTILE INDUSTRIES produce specialised fabrics for the military including for ballistic protection, combat clothing, parade clothing etc., applications. Textile Industries own Bruck Textiles and both of these companies participated in AIDEX 89.

SEE BRUCK TEXTILES

AUSTRALIANS TRADING IN DEATH AND DESTRUCTION

WE ALSO BUILD FA-18 HORNETS.

Australia may still be more famous for boomerangs than state-of-the-art aircraft. But perceptions are changing rapidly.

Right now, on the very doorstep of Asia, you'll find one of the world's most advanced centres for defence and aerospace design, technology and production.

The place is Victoria, Australia.

On a broad manufacturing base, Victoria has built an impressive defence and aerospace infrastructure. The state is the nucleus of research and development in Australia, with four world standard tertiary institutions and an extensive skills training system. There's a Cray supercomputer here for your use and we've also got a highly skilled workforce.

From advanced componentry to communications systems, Victoria has the capacity to develop, manufacture and test virtually any aerospace or military equipment or systems. For example:

- Construction and testing of FA-18 Hornet aircraft;
- Sikorsky Seahawk helicopters and Mamba light aircraft;
- Design and/or production via international joint ventures, e.g. the MDX helicopter airframes, the G.E. F404 and T700 engines.

■ Development and installation of sophisticated submarine and communications systems.

■ Building of 12 naval frigates at Williamstown, Australia's foremost marine engineering facility.

■ Maintenance, service and modification on fleets of aircraft from the domestic and international airlines, e.g. Continental and Qantas Boeing 747s.

Victoria is in the perfect position to serve the defence and aerospace industry, in more ways than one. We're an island of political, social and economic stability in the Pacific, but still very much a part of the Asian region.

So look into Victoria more closely for your next defence or aerospace project/joint venture. Like our boomerangs, you'll no doubt find reason to keep coming back.

Phone, fax or write for more information now.

Contact Paul Casey on (613) 412 8116, or fax (513) 416 8347.

Or write to: Defence and Aerospace Group,

GROWING TOGETHER

AUSTRALIANS TRADING IN DEATH AND DESTRUCTION

Actual flight test photo AGM-130, Figure A19, 11.

AGM-130. THE STANDOFF WEAPON SYSTEM THAT WON'T MAKE A DENT IN THE BUDGET.

In deep strikes against fixed or mobile high-value targets, precision, payload and range are essential to mission success. And to aircraft survivability.

The U.S. Air Force/Rockwell AGM-130 standoff weapon system has proved itself capable of not just fulfilling these requirements, but doing so at an affordable price.

Recent development and operational tests demonstrated AGM-130's ability to deliver a 2,000-lb. warhead with pinpoint accuracy under a rigorous set of tactical profiles that included various range and altitude flights.

AGM-130 provides an unmatched combination of high lethality, aircraft survivability, flight profile flexibility and low cost. As a powered derivative of the modular GBU-15 system currently operational with the U.S. Air Force, it's built on proven technologies and tactics. And it benefits from GBU-15's established production, logistics, training and support resources.

No other weapon system can deliver as much punch with as much precision. And no standoff weapon system is as affordable. For more information, write: Missile Systems Division, Rockwell International, 1800 Satellite Blvd., Duluth, Georgia 30136, or call (404) 476-6300.

TRANSFIELD HOLDINGS P/L

100 ARTHUR ST
NORTH SYDNEY NSW 2060

PH-02 929 8600
FX-02 929 7187

Associated companies: TRANSFIELD CONSTRUCTIONS P/L, EGLO ENGINEERING P/L, AUSTRALIAN MARINE ENGINEERING CORP. LTD, ICAI LTD, AUSTRALIAN SHIPBUILDING INDUSTRIES LTD.

TRANSFIELD design, develop and manufacture light aircraft, rolling stock, heavy vehicles, cranes, steel demountable panels and floating bridge systems. Transfield are involved in the development of many large military and quasi-military developments such as the Cape York Space Base, the Very Fast Train and the Multifunction Polis. Transfield are seeking to buy the NSW Dockyard. In 1987 Transfield purchased AUSTRALIAN SHIPBUILDING INDUSTRIES although Transfield have no experience in submarine repair they were somehow granted the contracts to repair the Oberon submarines which had been traditionally refitted at Cockatoo. ASI dropped its first Oberon submarine off the keel blocks it caused \$300,000 worth of damage later they wrecked the periscope housing mechanisms. The submarine then sailed off to Singapore for repair. Most major military facilities in Australia would have some connection with Transfield Construction. Transfield are currently involved in the MOTOROLA CORPORATION'S satellite project known as Iridium.

TRIPAL SYSTEMS P/L

140 BUCKHURST ST
SOUTH MELBOURNE VIC 3205

PH-03 696 3877
FX-03 696 2545

GENERAL MANAGER: J. B. PAYNE

TRIPAL SYSTEMS are involved in the design, development and implmentation of engineering projects, together with project management support for turn-key systems. The company has experience in real-time computer based systems related to modelling and simulation, test ranges, combat data systems, aircraft control, underwater acoustics, radar, sonar and automated test equipment.

TRIPPETT SHEDDEN

136 BUCKHURST ST
SOUTH MELBOURNE VIC 3205

PH-03 699 5779
FX-03 699 2279

SPF 100/4611

Siemens. A higher technology for the 90's

WHO PAYS? ... YOU DO

Government Departments, both Federal & State have thrown their support not only behind AIDEX, but also behind the whole concept of increased weapons production.

These are some of the Government bodies that need to be challenged on this issue. Most of their advertising invites people to phone for more information.

FEDERAL

AUSTRADE

PO BOX 2386
CANBERRA ACT 2601

PH-06 276 5258
FX-06 276 5229

AUSTRADE is the primary Australian government instrumentality selling Australia to overseas corporations including weapons corporations. As part of its advertising techniques Austrade produce a 45 page colour booklet boasting about such Australian incentives as generous tax incentives (up to 150% tax concession for industry research), our wonderful climate, the universities, colleges and public research institutions which are available for their use. Australia's low energy prices available to be exploited, the proposed multifunction polis, a broad range of financial services, our stable workforce and goes on to cite the Bond Corporation as an excellent example of Australian entrepreneurship. The booklet closes with the quote, "Australia invites you to share in its prosperity. Big opportunities are there for the taking . . . you could become a business migrant by moving your business to one of Australia's many excellent business locations. The door is wide open all you have to do is accept the invitation."

DEPARTMENT OF DEFENCE

RUSSELL OFFICES, PO BOX E33
CANBERRA ACT 2600

PH-06 265 9111
FX-06 266 6037

The Department of Defence is an arms exporter in its own right and has given its support to AIDEX 91 where it will be exhibiting.

SEE ALSO ADI (COMPANY LIST).

DEPARTMENT OF FOREIGN AFFAIRS

KING EDWARD TRC
CANBERRA ACT 2600

PH-06 261 9111
FX-06 273 3577

At the same time as the Foreign Affairs Minister is making noises about other countries' human rights abuses he is allowing the sale of weapons to those very same countries and supporting AIDEX. Could it be that our Foreign Affairs Minister enjoys bleating about human rights abuses so much that he is doing everything he can to ensure they continue?

DEPARTMENT OF INDUSTRY, TECHNOLOGY AND COMMERCE

GPO BOX 9839
CANBERRA ACT 2601

PH-06 276 1000
FX-06 276 1111

The Department of Industry has given its full support to AIDEX91. We have seen in the past the pride shown by the Minister for Industry on the announcement of a major arms export contract being awarded to an Australian company (well it wasn't really an Australian company . . .) The Department sees weapons sales as an excellent method of improving Australia's standing in the global community.

DEFENCE SCIENCE AND TECHNOLOGY ORGANISATION (DSTO)

ANZAC PARK, WEST BLDG, CONSTITUTION AVE
CANBERRA ACT 2600

PH-06 266 6516

CHIEF DEFENCE SCIENTIST: DR R. WARD

The DSTO was established in 1947 as the Australian instrumentality overseeing the atomic tests which took place at Maralinga in the '50's. The indigenous population in the Maralinga area are still seeking compensation from the Australian Government for the death, blindness and disease that were a direct consequence of these tests as well as compensation for the destruction of the land. The DSTO has come full circle and is now involved in the private enterprise weapons testing range which seems likely to go ahead in the same area.

With over 4,000 employees the DSTO is a much larger organisation these days which is broken up into 5 major divisions, these are:

AERONAUTICAL RESEARCH LABORATORY

PO BOX 431
MELBOURNE VIC 3001

PH-03 647 7400
FX-03 645 3869

DIRECTOR: D.E. HUMPHREYS

"MISSION To enhance Australian defence capability through research and development in aircraft structures, materials, aeropropulsion, flight mechanics, aircraft systems and avionics."

The ARL employs 500 staff and occupies 10 hectares in Melbourne and an additional 200 staff in Salisbury and the ARL is primarily concerned with flight mechanics and aircraft structures for military aircraft.

ELECTRONICS RESEARCH LABORATORY

PO BOX 1600
SALISBURY SA 5108

PH-08 259 5586
FX-08 259 6944

DIRECTOR: J. S. ALLISON

“MISSION To enhance Australian defence capability through research and development in command and control, military information systems, communications, signals intelligence and electronic warfare.”

The ERL was created in 1987 in an attempt to more closely align the priorities of the DSTO with those enunciated in the Defence White Paper. Functions of communications and electronic warfare have been combined with information technology. Substantial growth is planned in the next few years to reach a size comparable with other DSTO laboratories. ERL is broken up into 3 divisions these are:

The Communication Division which is undertaking research into the characteristics of transmission media including atmospheric, ionospheric and tropospheric media, signal reception and processing and the network dynamics of switched communications systems. A specialised section conducts mathematical research associated with cryptography and secure communications.

The Information Technology Division has its focus in 4 main areas: Secure Computer Systems, Computer Architectures and VLSI Implementations, Software Engineering particularly the Ada language and information systems.

The Electronic Warfare Division carries out research into electronic support measures and electronic countermeasures. Other significant activities are the provision of technical support for EW equipment on major ADF platforms such as the F-111C, F/A18, P-3C and capital ships.

MATERIALS RESEARCH LABORATORY

PO BOX 50
ASCOTVALE VIC 3032

PH-03 319 3250
FX-03 318 4536

DIRECTOR: W. CONNICK

“MISSION To enhance Australian defence capability through research and development in naval mine warfare, ship and submarine design and construction, protective chemistry, food sciences, materials applications and explosives.”

The origins of the MRL go back to 1910 when a former guard room at Victoria barracks became its first laboratory. It now has a staff of over 600. The MRL has a laboratory in Tasmania, Queensland and Sydney as well as the main lab in Melbourne. MRL undertakes activities such as research in the field of high explosives, detonants, pyrotechnics, terminal effectiveness and fuses. It also investigates metallic alloys, ceramics, polymers and composites. Through its tropical studies branch in Innisfail, it is able to test these materials and equipment in harsh environments.

SURVEILLANCE RESEARCH LABORATORY

PO BOX 1650
SALISBURY SA 5108

PH-08 259 5004
FX-08 259 5638

DIRECTOR: R.D. RAMSEY

“MISSION To enhance Australian defence capability through research and development in electromagnetic surveillance and reconnaissance.”

The SRL is involved in the Over The Horizon Radar project as well as many other surveillance activities.

WEAPONS SYSTEM RESEARCH LABORATORY

PO BOX 1700
SALISBURY SA 5108

PH-08 259 5657
FX-08 259 5476

DIRECTOR: C.R. EVANS

“MISSION To enhance Australian defence capability through research and development in weapons, tactical combat systems, underwater detection and surveillance.”

The WSRL has a total staff of over 650 and an annual budget of over \$30 million with which it investigates more efficient methods of killing people. It is broken up into 4 divisions these are: Ordnance Systems Division which conducts fundamental and applied research into propulsion systems, interior ballistics, gun and rocket propellants, intermediate and exterior ballistics and unguided weapons. The Combat Systems Division which is responsible for the research and development and provision of scientific and technical support to the ADF. Their areas of interest are digital system designs, software engineering, information technology, artificial intelligence, human factors, operational analysis and computing techniques. The Maritimes Systems Division researches ocean sciences and is directed at the scientific understanding of the environment in which marine systems operate. Their main areas of interest are sonar detection systems, underwater acoustics, geophysics, physical oceanography and ocean engineering.

The Guided Weapons Division is the primary focus of guided weapon technology concentrating on the development maintenance of a technology base in precision guided munitions. Research and development programs are also conducted in non-explosive PGM components such as sensors, seekers, guidance processing, inertial systems, digital autopilots, actuators, missile structures, etc

A little piece of engineering which all Australians are expected to be proud of is the Karinga. A cluster bomb developed by the Weapons Systems Research Laboratory, at around \$9 000 000. The idea behind a cluster bomb is to inflict crippling damage to dispersed 'soft-skinned' targets by scattering 'bomblots' over a wide area. The Karinga would have been a great little money spinner for Australia, if not for the fact that the US built a similar contraption cheaper. So cheap in fact that there were plenty to throw around Iraq earlier this year. There is an argument that these type of devices contravene international law and peace activists both in Australia and the US are looking further into the matter.

The DSTO will be at AIDEX 91 anybody wishing to register their disgust at these massive amounts of money being wasted in such immoral ways should give them a call and let them know. Anybody who likes the sound of it can call their recruitment office on 06 266 6823.

ENGINEERING DEVELOPMENT ESTABLISHMENT (EDE) OF THE AUSTRALIAN ARMY

RALLY RD
MARIBYRNONG VIC 3032

PH-03 319 5511
FX-03 318 3421

SUPERINTENDENT: N. OLIVER

The EDE (as well as being a testing facility) market a range of products including electron tubes, FM transmitters, MW transmitters, sleeping bags, uniforms, combat boots, radio systems, parachute data recorders and combat load carrying equipment.

DEFENCE PROJECT GROUP

228 VICTORIA PDE
EAST MELBOURNE VIC 3002

PH-03 412 8119
FX-03 419-0770

The Defence Project Group claims that the state offers an affluent, stable, economic and political environment. It encourages arms manufacturers to take advantage of its world class educational institutions which include Australia's only research CRAY super computer. The Victorian government's economic stability may no longer be there but they're not telling the arms companies that. In fact in January this year the Victorian Government made a commitment of a \$2.5 million contribution to the Telecom Defence Group, and \$1.5 million financial assistance for the First Australian International Air Show & Aerospace Expo, to be held next year.

SEE TELECOM (COMPANY LIST)

SWINBURNE INSTITUTE OF TAFE

JOHN ST
HAWTHORN VIC 3122

FX-03 819 5454

Swinburne Institute, with support from the Federal Government market scientific instruments and advanced manufacturing engineering systems training at military exhibitions such as PRIDE90.

BECAUSE THE MASTERS OF WAR ARE ALSO MASTERS OF OTHER THINGS

As with the company listings section, the products and brand names on the following pages are not comprehensive.

The lists are meant to highlight the extent to which, as consumers, workers and investors we are tangled in the web that the corporations and governments have spun.

This is not a 'non buyers guide'. It is the structures of greed we are attempting to challenge, reform at this point may not be enough!

If you were to attempt to only have dealings with the companies/products not listed in this book, chances are they are in someone else's book for poor worker conditions (here or overseas), maybe they test their products on animals or perhaps they are cutting down rainforests.

Even when the company names change, the bosses names often do not.

Be conscious of who you deal with and be responsible for your decisions, but it is in the final analysis, a question of whether it is acceptable for a small elite to control the vast majority of the planet's resources

AIDEX91 NATIONAL EXHIBITION CENTRE CANBERRA NOVEMBER 26-28 1991

AUSTRALIA'S INTERNATIONAL DEFENCE & EQUIPMENT EXHIBITION

AIDEX89 was the first major arms show to be held in Australia. Although this show was strongly opposed by many Australians, it was considered a great success by the organisers, the government departments and the companies exhibiting, with many sales opportunities having been made.

Desiko Pty Ltd, the company organising AIDEX91 claim that this years show will be 25% bigger than AIDEX89. The reception hall of NATEX as well as temporary buildings will ensure that the hundreds of death merchants who are flying in from all over the world will have ample space and privacy in which to demonstrate the latest methods and fashions of murder.

Mr Bob Day, Managing Director of Desiko, pointed to the large amount of 'first time' exhibitors and the "growth that we are experiencing" as placing AIDEX91 "right in the forefront of defence shows in the entire Asia/Pacific region"

Mr Day went on to say that "In spite of some of the hype of the peaceniks, the Gulf War has taught every sensible person that no country can afford to be complacent." Mr Day obviously expects greater participation in AIDEX91 from the Persian Gulf region,

stating that "the impact of the Gulf war will be felt on defence strategies and purchasing programs for many years to come"

A high level conference entitled "Australia and Space", to be held simultaneously with AIDEX, will ensure the presence of a large military aerospace contingent in Canberra.

Peace, social justice, religious, womens, youth, trade union, political and environmental organisations have joined forces in opposition to the AIDEX war fair and despite the claims in a recent AIDEX91 advertisement that "the pathetic little tribe of peaceniks.....have done little to raise the publics' consciousness about the cause of peace" and that "there is no room for critics of victory", a major rally is being organised with the objective of convincing the Australian Government & corporate sectors that the Australian people do not want this obscenity taking place.

One of the groups planning to be in Canberra for the AIDEX protests is the Australian Anti Bases Campaign Coalition (the only Australian peace group to bring out the army), and many 'Nurrungar style' actions may once again be the cause of serious embarrassment to the authorities.

Ecumenical peace services will also be taking place during the exhibition.

TIME TABLE

Australia's International Defence Equipment Exhibition

Stop AIDEX '91

Vigil: Parliament House Lawns, November 22-28

Blockade/Actions at the gates of Natex, November 23-28

FRI 22

Rally: Parliament House Lawns 12.00 to 2.00pm.
Contact: Canberra Program for Peace and RAAF.
Vigil: Parliament House Lawns sets up 12.00 noon, continues throughout AIDEX protests.
Contact: Canberra Program for Peace.

Candle Light Gathering: Parliament House Lawns 7.00 to 10.00pm - bring picnic supper and musical instruments.
Contact: RAAF. (Renegade Activist Action Force).

SAT 23

March to AIDEX site: gather Parliament House Lawns 10.00am.
Contact: RAAF.
Anti-AIDEX Concert: venue to be announced.
Contact: RAAF.

Blockade of exhibitions moving onto Natex site of AIDEX exhibition commences - starts 7.00am.
Contact: RAAF.

Workshops: Parliament House Lawns 10.00am to 3.30pm.

Contact: RAAF

SUN 24

Ecumenical Service: Parliament House Lawns 4.00 to 6.00pm.
Contact: Pax Christi.

Candle Light Gathering: Parliament House Lawns starts 6.00pm overnight. Bring picnic supper and musical instruments **Contact:** Pax Christi.

MON 25

Rally: Parliament House Lawns 10.00am to 12.00 noon.

Contact: Sydney Anti Bases Action Coalition.

Action: Parliament House Lawns.

2.00pm to 4.00pm.

Contact: Sydney Peace Squadron.

Rally: AIDEX site, 10.00am.

Contact: RAAF.

TUE 26

Commencement of activities at AIDEX site - continues throughout exhibition.

Note: AIDEX is open from Tuesday 26 to Thursday 28 November from 10.00am to 6.00pm.

Contact: RAAF.

Parallel Conference: Point of Impact. Australian National University. **Contact:** Peter Jones (06) 277 3790

WED 27

Womens Action: AIDEX site - morning.

Contact: Wimmin for Survival (Hobart)

Note: keen for other womens groups to join them.

THU 28

Environment Action: AIDEX site - morning.

Contact: Friends of the Earth (Melbourne)

Note: keen for other environment groups to join in.

Contacts List:

Canberra Program for Peace (062) 497 951 Bobi Meyer.

Pax Christi (02) 281 8390 Den's Doherty.

Friends of the Earth (Melbourne) (03) 419 8700 Cam

RAAF (02) 281 5100 Diana Ingram, or Jan and Jacob
PO Box 24 Kings Cross 2011.

Sydney Anti Bases Action Coalition: (02) 281 8390

Dennis Doherty or Hannah Middleton.

Sydney Peace Squadron (02) 316 5790 Rob Sainsa.

Wimmin for Survival, Hobart: (022) 72 9182 Liz Denham.

Message to all groups: This timetable will be continuously updated. If you want your groups activities and contact no's to be added contact: Diana (02) 281 5100

**MANY OTHER ORGANISATIONS WILL BE CONDUCTING
ACTIVITIES DURING AND IN THE LEAD UP TO AIDEX91 —
THE STOP AIDEX CAMPAIGN HOPES TO HAVE DETAILS AS
THEY ARE ORGANISED.**

It is hoped that the car park opposite NATEX (National Exhibition Centre) will be available, this depends to a large extent on the cooperation of the recently returned ALP Government in the ACT. As the ACT branch of the ALP spoke out against AIDEX89, this should not be a problem.

AIDEX91 will be the first major protest to take place in the ACT since control of most of the Police Force was transferred to the ACT Government. During AIDEX89, the Police reacted quite harshly to those arrested during the protest, taking such measures as refusing bail for people without an ACT address. It is hoped that under the new system the police will react somewhat differently. The presence of legal observers at all protest sites at all times which is being organised by the Stop AIDEX Campaign will facilitate support for anyone with police or legal problems (anyone out there willing to offer legal expertise are urged to get in touch)

It is envisaged that non-arrestable actions will be happening at all times for those who do not wish to take part in blockades.

All actions listed in this book will be based on the principles of non violent resistance.

In the lead up to November the campaign to stop AIDEX continues. Activities and events to focus awareness not only on AIDEX, but on the arms trade and militarisation are taking place.

The production of this book is in response to increased awareness leading to many requests for information.

S T O P P R E S S

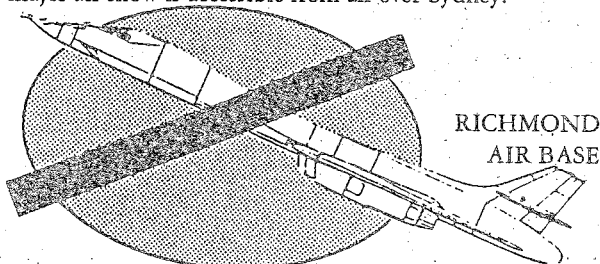

On the day of printing, the ACT Government announced that it is looking into the possibility of having AIDEX91 cancelled.

The Richmond Air Show

There are two distinctly different types of advertisement produced by the Aerospace Foundation, organisers of the Richmond Air Show.

The first gaily invites Sydneysiders to bring the kids along to have a look at the marvels of the air. Military aircraft from Australia and overseas will be made available for kids to view from close range - even climb over! Flyovers and aerobatic displays will combine with the fairyfloss and icecream on the ground to create a carnival atmosphere that no caring parent would want their kids to miss. Local businesses go into festival mode and the township of Richmond on the North Western outskirts of Sydney is bedecked in bunting. Special train services ensure that Australia's major air show is accessible from all over Sydney.

OCTOBER
11-13th

The other type of advertisement for the Richmond Air Show encourages buyers and sellers of aerospace weaponry to take the opportunity of the trade fair component of the show as an excellent place to do business. The trade fair of course takes place at a different time to the public admission events, so that the secrecy under which the masters of war are accustomed to doing business can be maintained and no troublesome citizens can get in the way.

The trade fair is the real reason for the Richmond Air Show. The sideshow featuring weapons direct from their victory in the Persian Gulf is a public relations exercise aimed at showing the 'human face' of the military industry.

Glorifying the weapons used to kill over 300 000 people this year is nothing more than an obscenity.

Encouraging children to marvel at these machines is yet another attempt to introduce militarism into the popular culture.

The Richmond Air Show is also being used as a precursor to Air Show Downunder, a major international event taking place in Victoria next year.

Sydney Anti Bases Action Committee (SABAC) is attempting to have the Richmond Air Show cancelled and also have contingency plans for a protest to take place if it goes ahead (which at this stage seems likely). Find their number on the previous page.

THE RICHMOND AIR SHOW

MARKET FORCES

by Paul Cosgrave

No longer do they merchandise weapons in plain wooden boxes.
No longer are the contents indicated by rough stencil letters.
No longer are the arms stored and concealed deep in the ground.

Now,

Armoury of every kind is displayed and marketed at glittering
trade shows.

Every despotic power on earth comes to browse and buy.

To kill
To maim
To torture
To make money
To buy weapons
To kill

There are glossy brochures shiny and smooth.
There are videos showing the vicious effects.
There are experts, professionals, veritable deathsmiths.

To sell
To advise
To make money
To make a killing

I report my findings to the trading standards office.
They act, and tell the organisers that they must not mislead.
At the following year's "trade show" the organisers complied.
All packages had labels with pictures of dead people on them.
Lying with faces blown apart.
Bowels, bellies and brains spilt on urban floors.
Charred bodies bent and twisted with heat.
Blood, urine and bile moistened the pouting lips of death.

Then I noticed

In small white print at the bottom of these labels the words,

These are only serving suggestions.

The millions lost to wars' violence are not the only victims.

The Social Balance Sheet

Public funds are limited. Alternative uses have value or "opportunity costs". Following are examples of the opportunity costs of the \$17,000,000,000 arms race. They represent the failures of the world's safety net to provide the protection that could be given if public policies and resources adequately addressed them. They speak to a need for a fundamental shift in world priorities.

Victims of Wars annual toll

525,000 killed in an average year in the 127 wars since 1945.

1,200,000 injured in an average year in the 127 wars since 1945.

Victims of Social Neglect annual toll

Children

250,000 are paralysed by polio.

700,000 become partially or wholly blind due to Vitamin A deficiency.

3,500,000 die of dehydration, preventable by oral therapy at \$1 per child.

4,000,000 die of six diseases, preventable by immunisation at \$10 per child.

10,000,000 do not survive to their first birthday.

14,000,000 die before their fifth birthday.

20,000,000 begin life dangerously underweight, vulnerable to early death.

146,000,000 under five years of age are underweight for their age.

150,000,000 aged between 6 and 11 years are not enrolled in primary school.

Mothers

500,000 die in childbirth.

10,000,000 who are themselves malnourished bear malnourished babies.

62,000,000 give birth without a trained person attending.

570,000,000 women cannot read and write.

600,000,000 women in the child-bearing years suffer from nutritional anemia.

Everyone

200,000,000 have iodine deficiency which can retard mental and motor skills.

950,000,000 are chronically malnourished.

1,100,000,000 do not have access to elementary health services.

1,600,000,000 do not have safe water to drink.

2,700,000,000 live in countries where average income is below \$500 per year.

2,900,000,000 lack the simple sanitary facilities essential to health.

INDEPO

DUBAI'92

SUPPORTED BY: MINISTRY OF DEFENSE UNITED ARAB EMIRATES

AN INTERNATIONAL DEFENCE, POLICE & CIVIL SECURITY EQUIPMENT EXHIBITION

26th - 29th January 1992 AT THE DUBAI WORLD TRADE CENTRE-UNITED ARAB EMIRATES

Contact AUSTRADE: Greg Hull (06) 276 5266; fax (06) 276 5274

Defence [E&IP]: Gary Luck (06) 266 6556; fax (06) 266 6902

Australian Agent: Bruce Davies (060) 41 3806; fax (060) 41 1256.

THE BEGINNING

The first step in challenging the masters of war is to expose them.

This book was never intended to be definitive, rather its purpose is seen as a spur for further action.

Much of the information on the companies and government departments in this book is incomplete either due to the lack of it or the conscious decision to not include much of what started coming in as we were ready to print. The task of fully researching these companies would prove to be a full time job in itself and although we feel this to be an area where much work is needed, we do not feel it to be our direction at this time.

The companies and government departments listed in this book pervade the entire fabric of our society. The chances are that either you or someone close to you work for a division of one of these companies. If we are to expose these war mongers we need more information.

The Renegade Activists Action Force are not arm chair political academics, we are, as our name suggests, a grass roots, action based group of activists who have collectively and individually been working on issues of militarism and environmental degradation for many years. We believe that this endeavour can only be successful if the information comes from the people.

The update of this book rests with you

Thanks to Mr T for most of the typesetting (the good bits), perserverance, Mr E for the printing and support and all those good people who were dislocated from their homes and workplaces by this project.

AUSTRALIANS TRADING IN DEATH AND DESTRUCTION

LOW SIGNATURE MISSILE SYSTEM, CIRCA 10TH CENTURY BC

DITTO, LATE 20TH CENTURY

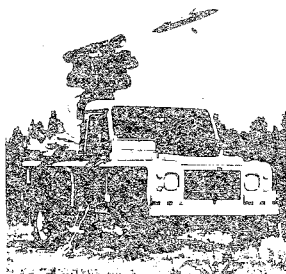

Complete flame suppression and no smoke are dear signs of Royal Ordnance's leadership in rocket motors and propellants. The Bofors RBS 70 missile with its minimal exhaust signature in both infra red and ultra violet spectra is a typical product of this leadership.

Other examples are rockets that won't explode when subjected to external fire or fragment attack.

Royal Ordnance produces a wide range of rocket propulsion systems. For land, sea and air guided missiles; for underwater, and in space. They're designed to operate reliably in extreme environmental conditions. And they're in service in all parts of the world.

We have the UK's only fully integrated rocket motor facility, offering research, design and development, manufacture and in-service support.

Today's forces need state-of-the-art technology more than ever before. Anything less falls short.

ROYAL ORDNANCE

AUSTRALIANS TRADING IN DEATH AND DESTRUCTION

1991 IBM AUSTRALIA CONSERVATION AWARD

A JOINT INITIATIVE
OF IBM AUSTRALIA LIMITED
AND THE ZOOLOGICAL PARKS BOARD OF NEW SOUTH WALES

Objectives of the Award

- To recognise significant achievement in any field of endeavour to advance the conservation of the natural environment.
- To promote greater public awareness of the breadth of current activity aimed at long term environmental conservation.
- To stimulate further work, including the development of new technologies which advance the conservation of the natural environment.

Scope of the Award

This Award has been established to recognise the quality of effort and personal commitment of both individuals and organisations in achieving significant results in one of the following fields of endeavour:

- scientific research
- application of research findings or technological development to management of environmental problems
- public education program
- public policy or the law
- community programs

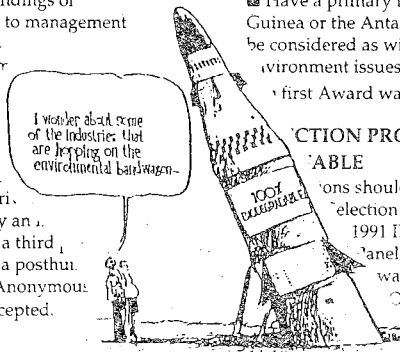

ELIGIBILITY

Submissions will be accepted by individual or group. There is no restriction on the nature of the institution, prior application can be made by an individual, institution involved or by a third party. In exceptional circumstances a posthumous mission will be accepted. Anonymous submissions will not be accepted.

Nominations for the Award should conform with the following criteria:

- Represent the results of work undertaken in the past five years.
- Demonstrate substantial and long lasting benefit to the conservation of the natural environment.
- Have a primary focus on Australia, Papua New Guinea or the Antarctic although other regions will be considered as will submissions relating to global environment issues.

The first Award was presented on 25 October, 1990.

SELECTION PROCESS AND AWARDS

Nominations should be submitted no later than 1 November 1990. Selection will be based on the recommendations of the 1991 IBM Conservation Award Panel. The Winner/s will be announced at the Award Presentation to be held in October 1991.

NATURE OF THE AWARD

The Award Winner will receive a cash prize of A\$35,000. Five additional prizes of A\$1,000 each may also be awarded.

All prize winners will receive a commemorative ceramic by Sydney Ceramist Mr Ray Rogers.

SUBMISSION DETAILS AND CONTACTS

Nominations should be addressed to:
The Chairman
